GROUP LONG TERM CARE INSURANCE PROGRAM

Why add long term care insurance to your employee benefits?

The need

Long term care insurance enhances Hamline University's benefit offerings by meeting a largely unrecognized need many of us may have. It pays for covered expenses for long term care services whether they are received at home, in the community or in a nursing facility. Here are a few points to consider:

- These expenses aren't covered by either our disability or health insurance.
- Relying on government programs may not be a viable solution.
- Without insurance, the costs of these services may have to come out of our savings.

The cost

Today, a private room in Minnesota nursing facility averages \$76,800¹ a year and costs are rising. So, a long term care situation could potentially cost at least \$230,400*, particularly if the cost of care continues to increase.

The opportunity

As a newly hired Hamline University employee, you can now buy this coverage at competitive group rates with streamlined underwriting depending on your age and the plan you choose, for the first 60 days of your employment.

Step 3: Choose a Benefit Increase Option

This program offers 3 Benefit Increase Options to help you protect against the rising cost of care:

Buy More Coverage Over Time

Every three years, as long as you're not in claim status, you'll be offered the chance to buy more coverage without answering any medical questions. The premium for the increase will be based on your age at the time you increased your benefits. If you decline the increase two consecutive times, future offers will not be made.

Automatic 3% Increase for Life - Compound

Your Monthly Benefit and Total Coverage will automatically increase by 3% compound every year, with no additional increase in your premium.

Automatic 5% Increase for Life - Compound

Your Monthly Benefit and Total Coverage will automatically increase by 5% compound every year, with no additional increase in your premium.
