Additional Notes:

- Most natural science classes are only recommended for majors, pre-med students, or those especially interested in the field. All natural science departments, as well as Anthropology, offer courses designed for non-majors. If you register for a science class that is intended for majors, an advisor may contact you to ensure that it is an appropriate choice. Read course descriptions thoroughly; most classes that are intended for non-majors will say so in the description.
- Be sure to read the relevant Curriculum section for your major in the current Hamline *Undergraduate Bulletin* (bulletin.hamline.edu); review course sequencing and select appropriate courses, depending on your potential major(s)
